Walkthrough Metal Detector

ITMD800A

ITM SYSTEMS
INTELLIGENT TECHNOLOGY MANAGEMENT

Metal signal indicator lights   Sensitivity knob
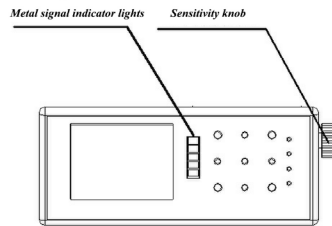

FUNCTION:

The ITMD800 is designed for Airports, Railway/Subway Stations, Banks, Embassies, Entertainment Centres, Malls, Exhibition Centres, Prisons

CHARACTERISTICS

- Automatic self-diagnostics when power on for the door panels, LED alarm sound
- Zoning Management: The detection zone can be adjusted into 8, 16, 24 Zones.
- It can record 20,000 alarm counts and can record the alarm time.
- Detecting Speed: The maximum speed is 100 P/min, can downward adjust the detecting speed.
- LCD backlight: 0-99S to display continuously, adjustable
- Recognition of the size of metal objects by different sound volume
- Vibration Protection: Preventing vibration interference lead to false alarms
- Alarm Sound: 1-25s alarm time, 0-255 adjustable alarm volume.
- LED Alarm: Four side with LED bar graph, light time 0-25s adjustable.

- Sensitivity Adjustment: Total value has High, Medium, Low, Custom sensitivity knob and each zone value 0-255 degree adjustable if selected Custom sensitivity.
- Alarm Count: Can record and auto save 9999 times; Passenger Count: can save passenger record to 65,530 times at most.
- Control unit case and door panels can be freely combined to assemble, very easy to install or disassemble.
- Battery Backup not less than 4 hours.
- Network support (Option)

TECHNICAL SPECIFICATION

- Power Supply:AC 85V-264V, DC 12V 3.5A
- Working temperature:-20C ~ +50C
- Standard: GB15210-2003, CE
- Net weight: 90 KG
- Standard External size: 2230 (H) x 835 (W) x 580 (D) mm
